

SPAGHETTI TOWER CHALLENGE

WHAT YOU'LL NEED

1 or 2 packs of spaghetti

1 or 2 packs of marshmallows

Egg (optional)

Before you start, find a flat surface and cover it with a sheet or some paper to stop bits of spaghetti and marshmallow from making a mess.

Step 1

Cut 1/3 off of the spaghetti and keep the longer length.

Step 2

Use marshmallows to join the spaghetti to make 4 squares, all connected with a middle marshmallow.

Step 3

Use all 4 squares to make 4 pyramids (using full size spaghetti), all connected together by the middle marshmallow and a marshmallow at the top of each pyramid.

Step 4

Use the 4 marshmallows at the top of each tower to build one final pyramid. Instead of using one marshmallow to hold them together at the top, use a few and join them together. This way it'll be easier to balance the egg should you want to balance one.

Step 5

Carefully add the egg to the top of the tower, ensuring it is balanced before you let go.
